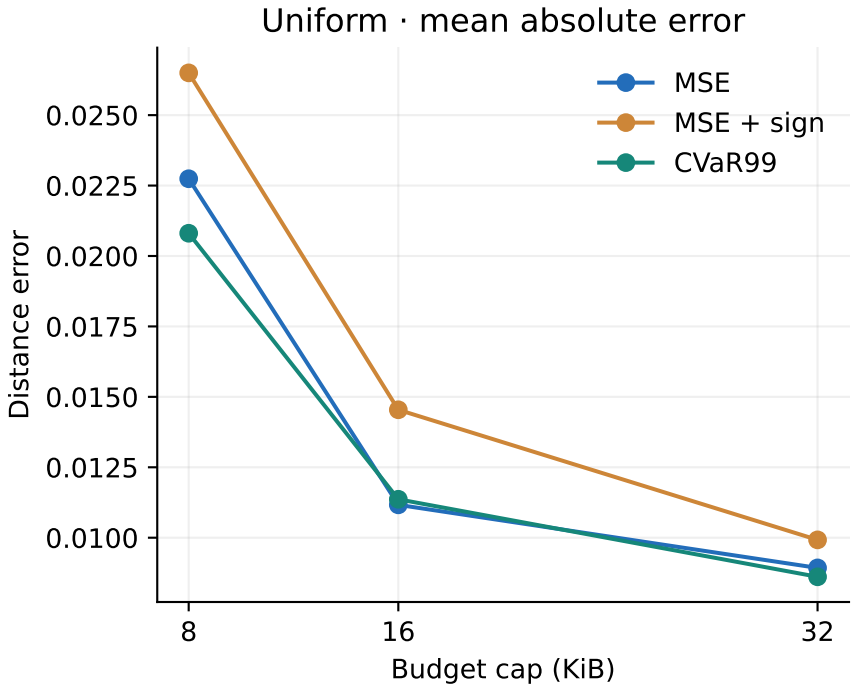
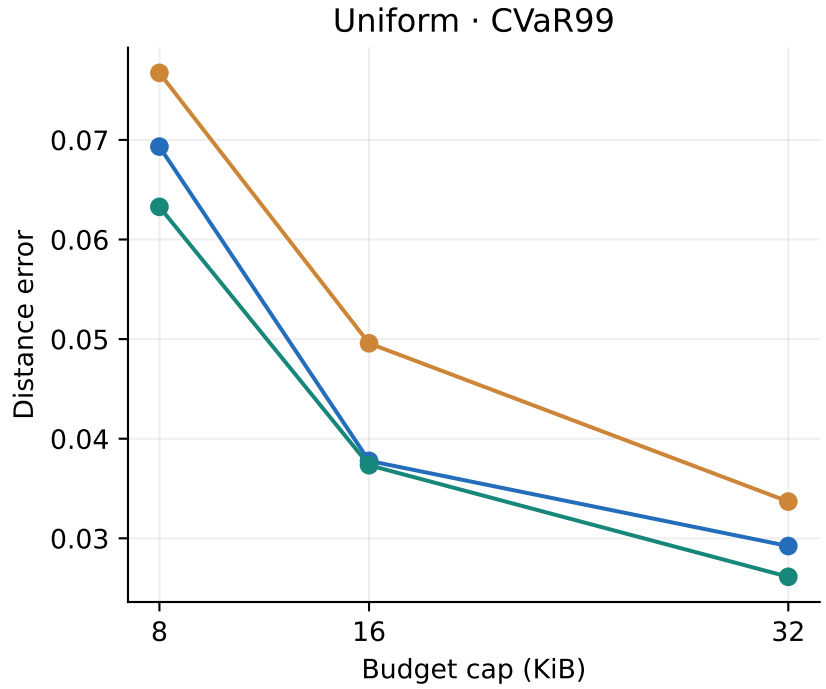
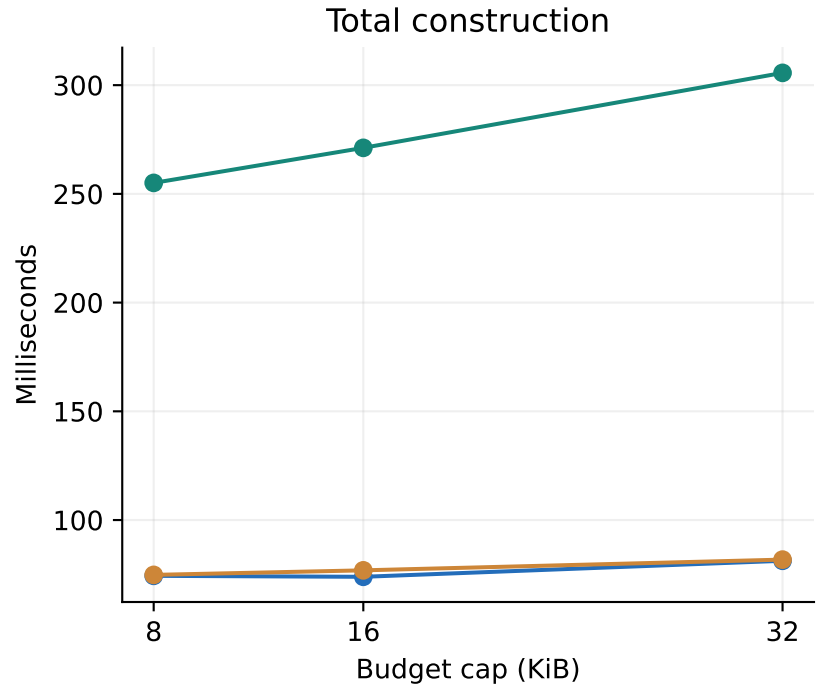
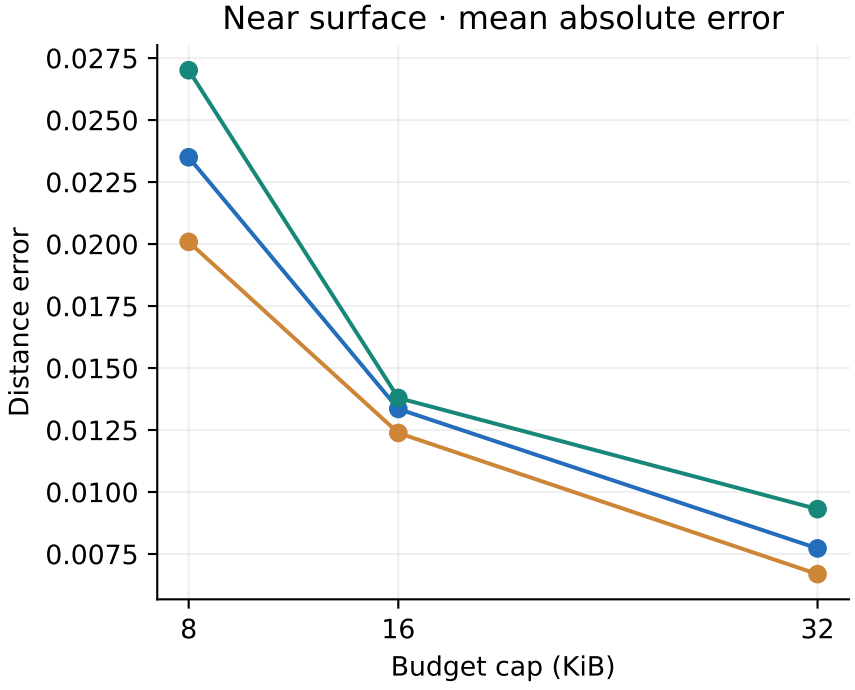
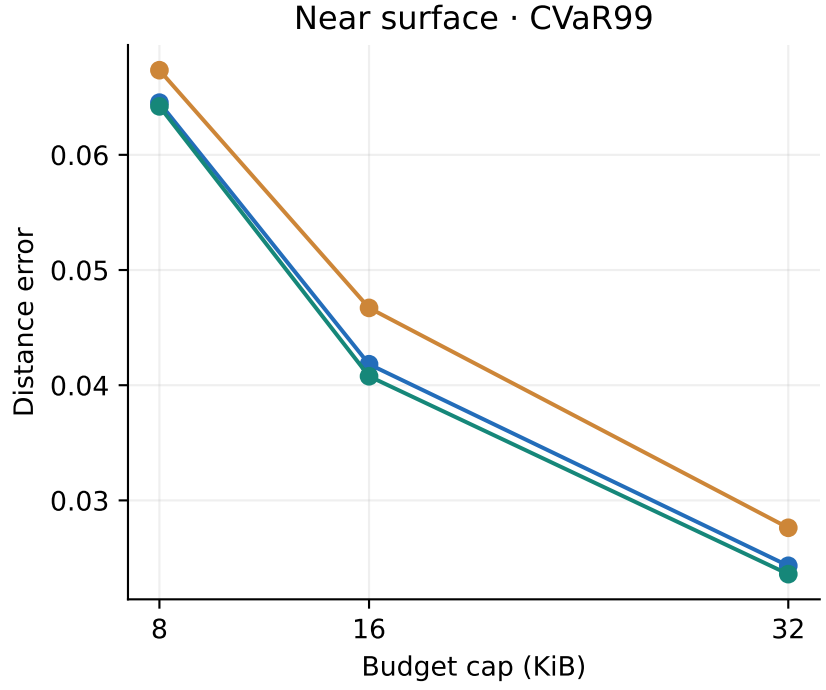
Fixed q8, depth five · mean of 24 cases · 100,000 queries per distribution











Geometry thresholds are identical

Minimum tested feature passing all checks:

Wall half-thickness	0.035 at all caps
Torus tube radius	0.10 at 8 KiB
	0.06 at 16/32 KiB
Sphere surface gap	0.10 at all caps

Requires both seeds, 64/96 extraction grids, oracle success and ≥95% sign-probe recall.

Lower tail error did not lower these thresholds.
